

Soil Testing Laboratories

We provide this partial list of regional soil testing laboratories as a courtesy. We do not endorse any single lab. There are likely others available. Updated May 2019.

Be sure to contact the lab directly for tests available (e.g. Olsen rather than Bray P for calcareous soils), current prices, and, if they provide fertilizer recommendations, know which state's guidelines they use to calculate fertilizer recommendations.

The North American Proficiency Testing Program (NAPT) lists participating labs at <https://www.naptprogram.org/about/participants>

For Agriculture Laboratory Proficiency (ALP) and MAP (manure analysis proficiency) certification ask the lab directly. A 'Y' in the column means 'Yes', 'N' means 'no', 'DK' means we 'don't know'.
